## COPY PASSPORT / ID

It is important that the **top of the passport** is also visible on the color scan. This is where the perforated document number can be seen.

Since 30 August 2021, the new passport model has been in use. This passport contains a QR-code with the citizen service number on **the back of the holder page**. Therefore, please also scan this side.

Do you have an ID card? Please scan both **the front and the back**.
